

JOB DESCRIPTION

Analyst Team Leader, SSL Insight, I&C

This role is based in London

POSTION OVERALL PURPOSE AND CONTEXT:

The Analyst Team Leader is responsible for managing and delivering data-driven insights and analytic solutions to business issues. The position involves scheduling projects, managing a small team of analysts and delivering larger projects.

REPORTS TO:

SSL Insight Business Unit Director

RESPONSIBILITIES:

The strategic accountabilities are: -

1. Manage a small team of analysts and help develop their analytical and insight skills.
2. Schedule and manage projects working with the Business Consultants to produce client ready output.
3. Use analytical knowledge to deliver high quality, actionable insight using the best methodologies.
4. Work with senior team members to develop the skills and processes of the analytics team.

The main day-to-day accountabilities are:

1. Schedule & manage analytical projects
2. Support analysts to help them produce client ready output and identify the best analytical tools & method to use.
3. Produce actionable and relevant insight from Business Consultants requirements
4. Carry out analysis using SQL/SAS and Self Serve (LMG's data mining tool)

REQUIREMENTS:

Experience Level and Technical Requirements for the Role

- University graduate with numerate degree (e.g. Maths, Science, Engineering).
- Minimum of 4 years experience in data analytics
- At least 1 years management experience
- Experienced user of SAS, experience in SQL would be useful.
- Experience of retail or general FMCG analytics, is highly desirable.

Personal Attributes

- Excellent communication skills in writing, presenting and interpersonally
- Strong organisation skills
- Ability to stay focused under pressure
- Strong attention to detail combined with the ability to plan strategically.
